### NEW QUESTION: 1

Which of the following methods would be a valid approach for capturing process execution errors? (Select 3)

- A. Selecting "send to external monitoring tool" from the Blue Prism process designer.
- B. Logging to event log and collecting via an external tool.
- C. Calling an external program to send SNMP traps.
- D. Generating emails from the process.

**Answer: B,C,D**

### NEW QUESTION: 2

Which of the following are common reasons to deploy multiple Application Servers for a single environment?

(Select 2)

- A. The number of connected clients and runtime resources
- B. Redundancy - e.g. to provide a level of continuity if one Application Server fails
- C. To increase the overall security of the environment
- D. The Application Server doubles up as a Web Server for a separate application

**Answer: A,B**

### NEW QUESTION: 3

What devices may a Runtime Resource receive INSTRUCTIONAL communications from?

(Select 4)

- A. Blue Prism Interactive Clients
- B. Blue Prism Credential Manager
- C. Other Blue Prism Runtime Resources
- D. Blue Prism Application Server(s)
- E. Third party systems accessing Blue Prism web services

**Answer: B,C,D,E**

### NEW QUESTION: 4

Which of the following is TRUE, when referring to connections configured using the "SOAP with Transport Encryption and Windows Authentication" mechanism? (Select 2)

- A. Data is encrypted
- B. Certificates are required
- C. Data is only encrypted if you select the "Encryption=True" box in the configuration screen
- D. Client and server can reside in separate Active Directory Network Infrastructures
- E. .NET remoting is used for Operating Communications

**Answer: A,B**

#### **NEW QUESTION: 5**

Which components of the Blue Prism solution may be supported via Presentation / Session Virtualization Software (such as Microsoft RDSH session virtualization)? (Select 1)

- A. Interactive Client (for Monitoring and Control)
- B. Runtime Resource
- C. All of the above
- D. Interactive Client (for development)
- E. Application Server

**Answer: A**

#### **NEW QUESTION: 6**

Which of the following statements are true, when considering the security of INSTRUCTIONAL communications to runtime resources? (Select 3)

- A. By default the connection is native TCP and not encrypted
- B. A central setting within Blue Prism can be used to prevent all associated Runtime Resources from accepting any instructional communications which are not encrypted.
- C. The runtime resource can be configured to use certificate-based encryption for all inbound communication
- D. The connection will be established via .NET remoting and will be encrypted as long as the "Use Secure Connections" flag is set
- E. The login agent will automatically use a certificate if the runtime resource is configured to use one

**Answer: B,C,E**
