NEW QUESTION: 1

You discover malware has corrupted the BIOS on your laptop. Which type of malware is this?

- A. exploit
- B. bootkit
- C. vulnerability
- D. rootkit

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 2

Which type of security device uses a single-pass, parallel processor hardware architecture to accelerate content inspection?

- A. next-generation firewall
- B. unified threat management
- C. stateless firewalls
- D. PoS-based firewall

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 3

How does machine learning enhance WildFire operation?

- A. analyzes file sample characteristics during static analysis
- B. analyzes file sample characteristics during dynamic analysis
- C. determines the optimum OS WildFire uses to analyze file samples
- D. determines which file samples should be forwarded to WildFire

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 4

Which type of SaaS application is allowed and provided by an IT department?

- A. tolerated
- B. certified
- C. sanctioned

D. unsanctioned

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 5

Match the common TCP/IP protocol with its corresponding port(s).

22	Drag answer here	File Transfer Protocol (FTP)
23	Drag answer here	Domain Name System (DNS)
67/68	Drag answer here	Telnet
20/21	Drag answer here	Secure Shell (SSH)
25	Drag answer here	Dynamic Host Configuration Protocol (DHCP)
53	Drag answer here	Simple Mail Transfer Protocol (SMTP)

Answer:

22	Secure Shell (SSH)	File Transfer Protocol (FTP)
23	Telnet	Domain Name System (DNS)
67/68	Dynamic Host Configuration Protocol (DHCP)	Telnet
20/21	File Transfer Protocol (FTP)	Secure Shell (SSH)
25	Simple Mail Transfer Protocol (SMTP)	Dynamic Host Configuration Protocol (DHCP)
53	Domain Name System (DNS)	Simple Mail Transfer Protocol (SMTP)

NEW QUESTION: 6

Which two items operate at the network layer in the OSI network model? (Choose two.)

- A. MAC address
- B. IP address
- C. router
- D. switch

Answer: B,C (LEAVE A REPLY)

NEW QUESTION: 7

Match the task for server settings in group mapping with its order in the process.

native	Drag answer here	Does not require installation of an OS
hosted	Drag answer here	Requires the installation of an OS
bare-metal	Drag answer here	
type 1	Drag answer here	

Answer:

native	Requires the installation of an OS	Does not require installation of an OS
hosted	Requires the installation of an OS	Requires the installation of an OS
bare-metal	Does not require installation of an OS	
type 1	Does not require installation of an OS	

NEW QUESTION: 8

Which security component can detect command-and-control traffic sent from multiple endpoints within a corporate data center?

- A. next-generation firewall
- B. stateless firewall
- C. port-based firewall
- D. personal endpoint firewall

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 9

Which network method securely connects two sites across a public network?

- A. router
- B. VLAN
- C. VPN
- D. switch

Answer: C ([LEAVE A REPLY](#))

NEW QUESTION: 10

Which type of firewall monitors traffic streams from beginning to end?

- A. stateless
- B. circuit-level gateway
- C. packet filter
- D. stateful

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 11

Which two remote access methods are secure because they encrypt traffic? (Choose two.)

- A. rlogin
- B. SSH
- C. IPsec-AH
- D. Telnet
- E. VPN

Answer: B,E ([LEAVE A REPLY](#))

NEW QUESTION: 12

Match the Palo Alto Networks Wild Fire analysis verdict with its definition.

Benign	Drag answer here	malicious in the intent and can pose a security threat
Grayware	Drag answer here	does not pose a direct security threat
Malware	Drag answer here	does not exhibit a malicious behavior

Answer:

Benign	does not exhibit a malicious behavior	malicious in the intent and can pose a security threat
Grayware	does not pose a direct security threat	does not pose a direct security threat
Malware	malicious in the intent and can pose a security threat	does not exhibit a malicious behavior

NEW QUESTION: 13

On an endpoint, which method should you use to secure applications against exploits?

- A. software patches
- B. strong user passwords
- C. endpoint-based firewall
- D. full-disk encryption

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 14

Which option lists the correct sequence of a TCP three-way handshake?

- A. SYN, ACK, SYN
- B. SYN, SYN+ACK, FIN
- C. SYN, ACK, FIN
- D. SYN, SYN+ACK, ACK

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 15

What is the function of a hashing protocol?

- A. encrypts data with encapsulation
- B. establishes an unencrypted tunnel
- C. provides data integrity
- D. establishes a secure tunnel

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 16

An attacker emails a malicious URL link to 50,000 email addresses. The email states that users can click the link to view the latest celebrity news, but the link also secretly infects the user's laptop. This scenario describes which type of attack?

- A. phishing
- B. drive-by download
- C. pharming
- D. whaling

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 17

What does Palo Alto Networks Traps do first when an endpoint is asked to run an executable?

- A. run a static analysis
- B. check its execution policy
- C. send the executable to WildFire
- D. run a dynamic analysis

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 18

Which security principle describes the practice of giving users the minimum rights to access the resources necessary to do their jobs?

- A. least privilege
- B. user privilege
- C. known privilege
- D. lowest privilege

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 19

Which option describes a characteristic of a distributed denial-of-service attack?

- A. uses a single remote host to delete data from multiple target servers
- B. uses a single remote host to flood a target network with traffic
- C. uses multiple types of malware to corrupt system services
- D. uses a botnet to flood traffic to a target network

Answer: D ([LEAVE A REPLY](#))

NEW QUESTION: 20

To which type of organization does the PCI DSS apply?

- A. any organization that accepts, transmits, or stores any cardholder data
- B. organizations that only accept cardholder data regardless of size or number of transactions
- C. only organizations larger than 100 employees that accept, transmit, or store any cardholder data
- D. organizations that only transmit data regardless of size or number of transactions

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 21

Which component of a digital certificate provides authentication of the certificate's issuer?

- A. digital signature
- B. certificate revocation list
- C. certificate's expiration date
- D. issuer's private key

Answer: A ([LEAVE A REPLY](#))

NEW QUESTION: 22

When accessing an intranet website, a certificate error is received. What can be done to move past the certificate error and ensure that the error is not received the next time the website is accessed?

- A. enable TLS 2.0 in the advanced options of the web browser
- B. trust the web developer for the application
- C. install the website certificate into the web browser
- D. request trusted access from the web developer

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 23

A firewall located on an organization's network perimeter can be used to protect against which type of attack?

- A. malware installed on the laptop by a disgruntled employee
- B. a malicious PDF file located on an internet website
- C. ransomware installed from an infected USB drive
- D. a malicious SaaS application file accessed from an unmanaged mobile phone

Answer: B ([LEAVE A REPLY](#))

NEW QUESTION: 24

Match each option with the term it describes.

on-demand, network access to off-premises shared computing resources	Drag answer here	Public cloud computing
enables applications to be configured, managed, and run on off-premises equipment	Drag answer here	virtualization
requires a choice between a bare-metal or hosted hypervisor	Drag answer here	
enabled multiple guest operating systems to run on a single on-premises server	Drag answer here	

Answer:

on-demand, network access to off-premises shared computing resources	Public cloud computing	Public cloud computing
enables applications to be configured, managed, and run on off-premises equipment	Public cloud computing	virtualization
requires a choice between a bare-metal or hosted hypervisor	virtualization	
enabled multiple guest operating systems to run on a single on-premises server	virtualization	

NEW QUESTION: 25

You discover an infected email attachment that contains software code that attacks a known vulnerability in a popular social networking application. This type of software code belongs to which type of malware category?

- A. pharming
- B. exploit
- C. virus
- D. social engineering

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 26

What method can be used to guarantee that a document originates from you and no one else?

- A. public key encryption, encrypting the document with the private key and making the public key available to others

B. public key encryption, encrypting the document with the private key and making the private key available to others

C. symmetric encryption, encrypting the document with the secret key and making the same secret key available to others

D. symmetric encryption, encrypting the document with the secret key and making a different secret key available to others

Answer: ([SHOW ANSWER](#))

NEW QUESTION: 27

Match the network infrastructure item with its corresponding description.

router	Drag answer here	provides data to systems on a LAN, WAN, or over the internet
firewall	Drag answer here	connects to electronic resources through network architecture
server	Drag answer here	forwards packets from one network to another based on destination address
client	Drag answer here	connects global WAN computer systems across the world
internet	Drag answer here	prevents unauthorized communication between computer networks and hosts

Answer:

router	forwards packets from one network to another based on destination address	provides data to systems on a LAN, WAN, or over the internet
firewall	prevents unauthorized communication between computer networks and hosts	connects to electronic resources through network architecture
server	provides data to systems on a LAN, WAN, or over the internet	forwards packets from one network to another based on destination address
client	connects to electronic resources through network architecture	connects global WAN computer systems across the world
internet	connects global WAN computer systems across the world	prevents unauthorized communication between computer networks and hosts

NEW QUESTION: 28

Company policy allows employees to access the internet. While searching for office supplies on the internet, a corporate user mistypes a URL, connects to a malicious website, and unknowingly downloads malware.

Which action should have been taken to prevent the malware download but still allow user access to the internet?

- A. allow only encrypted HTTPS access to the internet
- B. permit web connections only to TCP port 443
- C. deploy a firewall with content filtering capabilities on the corporate perimeter
- D. configure digital certificates for all users to authenticate internet downloads

Answer: C (LEAVE A REPLY)
