Title : Oracle Manufacturing Cloud
2021 Implementation
Essentials

Vendor : Oracle

Version : DEMO

NO.1 Identify three requirements fulfilled by nonstandard work orders.

- A. Repair
- B. Prototype
- C. Rescheduling
- D. Rework

Answer: A,B,D

NO.2 Work order costs are computed based on material and resource transactions reported and the cost method of the product. In a manufacturing plant, the production operator has completed a work order WO-001 ensuring proper materials and resource transactions. The materials are costed and resources are defined with rates.

A cost accountant has created cost accounting distributions. Upon reviewing the accounting distributions of the work order WO-001, resources charged to the work order are missing. Identify the Concurrent Request that needs to be submitted to transfer resource charges to cost accounting.

- A. Create accounting
- B. Transfer Costs to Cost Management
- C. Transfer Transactions from Inventory to Costing
- D. Transfer Transactions from Production to Costing

Answer: D

NO.3 You are monitoring the production status on your shop floor. The production operator informs you that a particular resource that was not functioning for the past week is now back in operation. Which option shows the steps to quickly release the work orders affected by this operation, which were put on hold using the mobile application?

- A. Select the infotile On Hold> Select a work order you want to release> Select the work order operation on hold > Swipe left on the work order name> Tap or click the Release action, and click OK
- B. Select the infotile On Hold> Select a work order you want to release> Swipe left on the work order name> Tap or click the Release action, and click OK
- C. Select the infotile Dispatch List> Select a work order operation you want to release> Swipe left on the work order name> Tap or click the Release action, and click OK
- D. Select the infotile Unreleased> Select a work order you want to release> Swipe left on the work order name> Tap or click the Release action, and click OK

Answer: C

NO.4 A production Supervisor has noticed that Work Orders created manually are overwritten by the plan runs executed by Planning Central. After discussing this issue with the Planner, two actions are recommended to prevent the Work Orders from being overwritten by plan runs. Identify the two recommendations.

- A. Update Firm flag in the Details region of the Edit Work Definition page.
- B. Update Firm flag in the Details region of the Edit Work Definition Names page.
- C. Update Supply Plan Options, Overwrite Firm Planned Orders = None.
- D. Update Firm flag in the Details region of the Edit Work Order page.

Answer: C,D

NO.5 Identify three types of Item Quantities displayed in the Work Order History tab.

- A.** Scrapped Quantity
- B.** Remaining Quantity
- C.** Total Quantity
- D.** In Process Quantity
- E.** Completed Quantity

Answer: A,B,E
