Free Exam/Cram Practice Materials.

**Exam** : **H13-211**

**Title** : **HCIA-Intelligent Computing  
V1.0**

**Vendor** : **Huawei**

**Version** : **DEMO**

**NO.1** Linux is a general term for a class of free-to-use and free-spread UNIX-like computer operating systems.

Which of the following is not an advantage of Linux.

- A.** LINUX system is an open source system, which is relatively mature and has a complete set of authority mechanisms. High security and stability
- B.** Linux has a rich set of free web server software, database and web development tools
- C.** The graphical interface makes it extremely easy to use compared to other systems, greatly reducing the user's learning cost
- D.** Multiple users can own and use system resources, that is, each user has specific permissions on its own resources, without affecting each other

**Answer:** C

**NO.2** The following statement about artificial intelligence is wrong.

- A.** Artificial intelligence is a theory, method, technology and application system that uses digital computers or digital computer-controlled machines to simulate, extend and expand human intelligence, sense the environment, acquire knowledge and use knowledge to obtain the best results
- B.** The development trend of artificial intelligence technology is the open source technology platform, the development of dedicated intelligence to general intelligence, and the development of intelligent perception to intelligent cognition
- C.** Machine learning is the core of human intelligence
- D.** Artificial intelligence is intelligence that uses people as carriers

**Answer:** D

**NO.3** PAAS provides an application development and operating environment, including a database of middleware.

The software below the server upper layer belongs to the PAAS layer.

- A.** JAVA
- B.** CRM (SAAS)
- C.** MYSQL
- D.** KVM(LAAS)

**Answer:** A,C

**NO.4** The type of authorization that Huawei HiSilicon obtained from ARM is.

- A.** Architecture/instruction set authorization
- B.** Processor authorization
- C.** Processor optimization package/physical IP package authorization

**Answer:** A

**NO.5** Memory is an important part of the computer. It is a bridge to communicate with the CPU. The real change of internal mining performance affects the overall performance of the server. With the rapid development of the server, please use memory to gradually evolve. The direction may be.

- A.** Increasing capacity
- B.** The power is getting higher and higher

- C. The voltage is getting higher and higher
- D. The frequency is getting higher and higher

**Answer:** A,C,D

**NO.6** Hardware resource pooling is the future evolution trend of server hardware, which of the following is not its advantage.

- A. Resource solution
- B. Dynamic resource allocation
- C. Single system runs independently and efficiently
- D. Realize intelligent scheduling and optimization

**Answer:** C

**NO.7** Isomorphic computing is a computing method that uses the same type of instruction set and architecture to form a system of computing units.

- A. FALSE
- B. TRUE

**Answer:** B

**NO.8** Middleware is mainly to provide running and development environment for upper-layer application software, provide pre-made and reusable business function modules, API interface, etc. to help users flexibly and efficiently develop and integrate complex application systems.

- A. TRUE
- B. FALSE

**Answer:** A

**NO.9** The CPU is a typical von Neumann architecture, where the data signal enters the controller from the input device, and then arrives at the operation for calculation.

- A. TRUE
- B. FALSE

**Answer:** B

**NO.10** NVMeExpresss (VMe). is a logical device connected to the city. Relying on the PCIe bus, IVWe devices can be applied to various physical slots that support the PCIee bus.

- A. TRUE
- B. FALSE

**Answer:** B

**NO.11** The network cards are classified according to the protocol type and are divided into.

- A. Ethernet card
- B. FC network card
- C. IB network card

**Answer:** A,B,C

**NO.12** Hard disks can be divided into mechanical hard disks, solid state hard disks and hybrid hard

disks according to storage media. The storage media of solid state hard disks is.

- A. magnetic head
- B. Disk
- C. FLASH chip
- D. integrated circuit

**Answer:** C

**NO.13** Stateless computing means that the scalability of the computing server can be remotely configured, inherited, copied, and migrated, thereby automating the deployment, replacement, and business migration of the server, without the need for reconfiguration operations, and the calculation reaches statelessness".

- A. FALSE
- B. TRUE

**Answer:** B

**NO.14** What are the following application scenarios that do not belong to FPGA?

- A. Telecom equipment chip
- B. PaaS service
- C. NFV universal server performance improvement
- D. Cloud computing acceleration service

**Answer:** A

**NO.15** Compared with individual user operating systems, the advantages of server operating systems are.

- A. Have a better experience in graphics and entertainment
- B. Stronger performance stability
- C. Higher security
- D. Have a better experience in file management or web applications

**Answer:** B,C,D
